1 Message from the Editors
A Thompson, J Antel and W Carroll

EDITORIAL
2 One step forward in the quest for evidence of the efficacy of cognitive rehabilitation in multiple sclerosis
I-A Finner and J Sastre-Garriga

TOPICAL REVIEW
3 Using magnetic resonance imaging in animal models to guide drug development in multiple sclerosis
N Naitoh, S W Yong and J Deen

MEETING REVIEW
12 Multiple Sclerosis Outcome Assessment Consortium: genesis and initial project plan
RA Butinck, N Laffraca, LD Hudson and MSHAC

NEW PERSPECTIVES
18 Constructing an adaptive care model for the management of disease-related symptoms throughout the course of multiple sclerosis—performance improvement CME
AE Miller, BA Cohen, SC Krueger, CE Markowitz, DH Nathan and HS Treado

PERSONAL VIEWPOINT
24 Assessing dalfampridine efficacy in the physician’s office
JB Raffel, O Malik and KS Nichols

RESEARCH PAPERS
27 Oligoclonal bands in multiple sclerosis reactive against two herpes viruses and association with magnetic resonance imaging findings
JO Vinters, J Wohler, K Ferron, DS Reich and S Jacobson

PERCEPTUAL LEARNING
36 Interlacing-1204 in the spatial dual as a biomarker for clinically isolated syndrome
R Oobach, M Gruevich and A Achiron

IMMUNOSUPPRESSIVE THERAPY
43 Immunosuppressive therapy reduces axonal damage in progressive multiple sclerosis
M Axelson, C Malmstrom, M Gunnarsson, H Zetterberg, P Sundstrom, J Lycke and A Svenningsson

ELECTROPHYSIOLOGICAL MARKERS
51 Electrophysiological markers and predictors of the disease course in primary progressive multiple sclerosis
R Schlaeger, M D’Souza, C Schindler, L Ginzl, L Kappos and P Fahl

LIMITED UTILITY OF CURRENT MRI CRITERIA FOR DISTINGUISHING RECURRENT ONSET MULTIPLE SCLEROSIS OF LONG DISEASE DURATION
72 Magnetic resonance imaging correlates of physical disability in relapse onset multiple sclerosis of long disease duration
H Kramer, MA Rocca, P Valasaku, L Bulk, J Santos-Gurgue, J Rethans, S Ruggieri, A Rovira, C Stepinski, L Kappos, T Springer, P Tortorella, M Rosas, C Casparro, X Munautalau, JV Garrau, CH Polman, F Barkhof, M Filippi, DA Altmann, G Cocciaelli, DH Miller and DT Chang

81 Balance deficit with opened or closed eyes reveals involvement of different structures of the central nervous system in multiple sclerosis
L Prenpenn, N Peaton, E Rue, E Shallott, F Tona, CR Mancinelli, C Porrotte and P Fantini

91 Computer-assisted rehabilitation of attention in patients with multiple sclerosis: results of a randomized, double-blind trial
MP Amanti, B Garetz, RG Vithana, E Portacopi, C Novicko, B Halikis, P Laffitaldino and M Tejano

99 Neuropsychological rehabilitation does not improve cognitive performance but reduces perceived cognitive deficits in patients with multiple sclerosis: a randomised, controlled, multi-centre trial
A Mártyncse, E Rosit-Ojajärvi, K Karpova, A Lilja, H Bihulka and P Himmelblad

SHORT REPORTS
108 Safety, anxiety and existentialism in multiple sclerosis patients
JA van Roonen, A Vingerhoets, L Bulk, BM Unkelbach, CH Polman and J Killestein

116 Negative work events and accommodations in employed multiple sclerosis patients
RHJ Benedict, JD Rodgers, N Emmert, R Kranenger and B Wewoost-Guttman

CASE STUDY
120 Myocarditis and diffuse skeletal muscle oedema: new features of neuromyelitis optica spectrum disorder? A case report
J Palace

LETTERS TO THE EDITOR
123 Clinical commentary on: Myocarditis and diffuse skeletal muscle oedema: new features of neuromyelitis optica spectrum disorder? A case report
A Cerasa, F Tomaiuolo, and A Quattrone

124 Which is the goal of cognitive rehabilitation in multiple sclerosis: the improvement of cognitive performance or the perception of cognitive deficits?
A Corso, F Tomaso, and A Quattrone

126 Neuropsychological rehabilitation should not aim only at improving cognitive performance as perceived by patients with multiple sclerosis: results of a randomized double-blind trial
I-K Penner and J Sastre-Garriga

VOLUME 20 | NUMBER 1 | JANUARY 2014
