Predictors and dynamics of postpartum relapses in women with multiple sclerosis

Hypervitaminosis-D and EBV: no interdependence between two MS risk factors in a healthy young UK autumn cohort

C Ramien, A Pachino, S Sitay, J Bégum, A Leese, G Disanto, J Kühle, G Giovannetti, A Rickinson, SV Ramagopalan, P Moss and U-C Meier

Isolated bilateral horizontal gaze palsy as first manifestation of multiple sclerosis

S Kipfer and DW Crook

Modeling probability of additional cases of natalizumab-associated JCV sero-negative progressive multifocal leukoencephalopathy

RL Carruthers, T Chitnis and BC Healy

Need for differentiation of real and clinical important change in research on responsiveness of walking outcome measures in multiple sclerosis

P Feyes, I Baert, U Dalgas and T Smedal

Can HPV immunisation cause ADEM? Two case reports and literature review

P Pellegrino, C Carnovale, V Perrone, S Antoniazzi, M Pozzi, E Clementi and S Radice

Multiple sclerosis severity score in a cohort of Moroccan patients

A Aragi-Housami, I Lahlos, Y Benkadmir, H Elotman, I Hajaj, N Kissani, N Chtaou, A Zaam, MF Belahsen, E Elmutawakil, MA Rafai and I Slassi

Progressive multiple sclerosis does not associate with rs996343 and rs2046748

CQ Bernales, JP Ross, JD Lee, Y Zhao, AD Sadovnick, AL Traboulsee and C Vilarino-Güell

Cover image adapted from Figure 7, in the article, *Ribosomal protein S6 mRNA is a biomarker upregulated in multiple sclerosis, downregulated by interferon treatment, and affected by season*, GP Parnell et al. page 683.
